

# Bigger Facility. Greater Capacity. Same Trusted Quality.

## This is huge.

We're expanding to meet demand — adding space and installing a powerful new burning machine that cuts large steel plates, up to 40 feet, with incredible precision. That means faster turnaround, with multiple bevel capabilities right at the machine, and more ways to deliver the quality work we're known for.

“This expansion is a direct response to our customers' trust in us and the growing need for our services within 100 miles of Mars, PA.”

— Clayton Woodward, President & Owner
